Introduction to the Java Programming Language - universe. With these changes came a new way to program: Java. Java is the preeminent language of the Internet, but it is more than that. Java revolutionized programming, changing the way that we think about both the form and the function of a program. To be a professional programmer today implies the ability to program in Java—it is that important.

Programming in Java - University of Cambridge - Since Java 8 is now support some of the functional programming concepts e.g. lambda expressions, map, flatmap, reduce etc, it becomes important to learn how to work together in both OOP and FP at the same time.  
Java technologist Richard Warburton, author of Java 8 Lambdas, discusses similarities between these programming paradigms and points out that both FP and OOP are actually moving closer toward each another.
