(PDF Download ... - Protein kinase C,  
commonly abbreviated to PKC  
(EC 2.7.11.13), is a family of  
protein kinase enzymes that are  
involved in controlling the  
function of other proteins through  
the phosphorylation of hydroxyl  
groups of serine and threonine  
amino acid residues on these  
proteins, or a member of this  
family. Fri, 31 May 2013  
23:53:00 GMT  
Protein kinase C - Wikipedia -  
Protein kinase C. Protein Kinase C  
Signaling Protein Kinase C (PKC)  
is a family of serine-threonine  
kinases found in most cell types  
whose activity has a strong  
influence on a wide variety of  
signal transduction events. Sun,

Protein kinase C - an overview |  
ScienceDirect Topics - PKC  
(protein kinase C) has been in the  
limelight since the discovery  
three decades ago that it acts as a  
major receptor for the  
tumour-promoting phorbol esters.

Protein kinase C

pharmacology: refining the  
toolbox ... - Protein Kinase C is  
an 82kDa monomeric enzyme  
consisting of a C-terminal  
catalytic domain and a  
cysteine-rich N-terminal  
regulatory domain. Purified from  
rat brain. Mon, 04 Dec 2017

Effect of protein kinase C inhibitors and  
activators on ... - This study was  
conducted to investigate the  
possible involvement of protein  
kinase C (PKC) and serine/threonine  
phosphorylation of the insulin  
receptor in insulin resistance  
and/or obesity. Wed, 18 Apr  
2018 23:14:00 GMT  
Involvement of protein kinase C  
in human skeletal muscle ... -  
Protein kinase C (PKC) family  
members regulate numerous  
cellular responses including gene  
expression, protein secretion, cell  
proliferation, and the  
inflammatory response. The basic  
protein structure includes an  
N-terminal regulatory region  
connected to a C-terminal kinase  
domain by a hinge region. Tue,  
14 Sep 2004 23:53:00 GMT  
Protein Kinase C Signaling  
Interactive Pathway | Cell ... -  
The protein kinase C (PKC)  
family, discovered in the late  
1970s, is composed of at least 10  
serine/threonine kinases, divided  
into three groups based on their  
molecular architecture and  
cofactor requirements. Sat, 31
